### Objective

Creative and driven Frontend Developer with expertise in ReactJS, TypeScript, and modern web development tools, passionate about crafting intuitive and high-performance user interfaces. Committed to leveraging technical skills and teamwork to build innovative solutions that elevate user experiences.

### Work Experience

#### SOFTWARE ENGINEER - FRONTEND | GOML

MAR 2024- PRESENT

##### MODAMIA.

Designed and developed a web application for an apparel company using React.js, incorporating an AI-powered image recognition system that analyzes body measurements and captures body position landmarks to provide personalized clothing recommendations based on the user's occasion.

##### ARIS

Aris is a social media platform that connects users and offers AI-driven relationship and career advice. Through an interactive Chabot and personalized test reports, it provides insights and guidance to enhance personal connections and career growth.

#### SOFTWARE ENGINEER | ARCHSLATE INC

FEB 2023- FEB 2024

##### ARCHSLATE

Developed and implemented a streamlined process to help hirers track candidate performance across multiple interview rounds, enabling efficient comparison and selection finalization. Led improvements in the project module to optimize team collaboration and workflow. Successfully on boarded new team members by coordinating project integration, task assignments, and real-time task status tracking, enhancing overall team efficiency.

#### JUNIOR SOFTWARE ENGINEER | IONIXX TECHNOLOGIES

FEB 2021- FEB 2023

##### DW POST-TRADE SYSTEM.

Developed and maintained a web application to optimize post-trade processes. Implemented and enhanced key modules, including Company, Accounts, Security Transactions, and Account Transactions, improving system functionality and performance.

##### MOJITO

Developed a web application for NFT trading, focusing on key modules such as KYC, Profile Maintenance, Wallet, and Orders. Integrated the Mojito Wires package to provide a seamless and reliable payment gateway, enhancing transaction efficiency and user experience.
